

Minimalist object. Magic light.

In the form of CRIB, serien.lighting offers a contemporary, reduced, and precise wall luminaire. Here, the latest technology is transposed into a unit with a minimum size. Anyone looking at it immediately associates the shape of the minimalist stand-alone luminaire with innovative LED technology.

When switched off, CRIB functions formally like an extremely reduced wall object thanks to its simple aluminum body and transparent Optiwhite genuine glass pane – a mere 8 mm thick. Only when it is switched on is the sophistication of the glass element revealed, through whose polished edge the LED light exudes: The delicate, specially treated pane of genuine glass distributes the light evenly upwards and downwards.

CRIB blends in particularly well in contemporary interiors and is available with black or white coated housing with a stainless steel or chrome finish. It can be mounted horizontally and vertically and with its minimalist shape creates a magical light effect when used as a single luminaire or in a row of several units.

It will be available from first quarter 2019.

CRIB Wall

material	housing: black or white coated stainless steel finish or chrome finish; lamp cover: optiwhite glass with microstructure
lamp	LED Mid Power 12 W, CRI Ra>90, R9>50, EEI A+ (suitable for A++ to A); other technical versions (CCT/CRI/power) on request
control	TRIAC dimmable with external trailing edge dimmers
light	upwards and downwards diffuse
accessories	mirror adapter
design	Manfred Wolf
awards	2019 German Design Award »Winner«
